Petition:

Say NO to a proposal for an oversize development next to Heather Farm Park. Let's join together to ask that this 30-acre piece of Walnut Creek's natural heritage is saved from over-development.

To stay informed and updated you MUST either go to our website SaveSevenHillsRanch.org and enter your email address OR send an email to SaveSevenHillsRanch@gmail.com. (You are NOT automatically added to our email distribution list by signing the petition.)

(NOTE! We have also collected signatures on paper, so the total number of signatures are greater than shown here!)

A developer (website: spk.com) wants the county to change their General Plan to allow a massive compound of multi-story buildings in an undeveloped area next to Heather Farm Park. Sign the petition to ask the Contra Costa County Board of Supervisors to deny the developer's application for a land use designation change.

Visit [Save Seven Hills Ranch](http://SaveSevenHillsRanch.org) to learn of efforts to preserve this property for now and future generations; to ask for a better plan.

1.	Rosemary N	Walnut Creek, CA	This is a beautiful piece of nature/property that should not be stripped and destroyed by a large private commercial company.
2.	Anonymous	NOVATO, CA	
3.	Michele & S	WALNUT CREEK, CA	This is an inappropriate change for this magnificent property. It is way over the top to allow this right next to a park and regular size homes.
4.	Nancy V	WALNUT CREEK, CA	Keep the General Plan Land Use as Single Family Residential Medium Density. That means a max of 149 homes on the 30 acre parcel. We don't need 351 units plus 100 more units in a nursing home with 250 employees and 622 parking spaces.
5.	robert s	Walnut Creek, CA	Several reasons, but one is that this is too large a development for the area.
6.	Mikhail D	Walnut Creek, CA	To keep u comparable beauty of Walnut Creek, to cut overcrowded transportation lines, preserve natural beauty
7.	Marcia N	Walnut Creek, CA	I live in Heather Farms HOA and will be greatly impacted by this development as our property butts up to Kinross spur. The traffic created by this development would change our neighborhood from a quiet exsistence to a noisy high traffic area. Would you want this to happen where you live? Please do not allow the change in land use designation. Thank you.
8.	Ann H	Walnut Creek, CA	I live right on the edge of this beautiful open space. Dailey I can see anywhere from 12 to 24 deer and always the turkeys and coyotes this is their sanctuary. An abundance of birds and wildlife. Equally important if not more so is the traffic this will now produce on the already overcrowded Ygnacio Valley Road and now Marchbanks will be impacted. The noise level will be unbelievable. And there is the golf course right here where golf carts go back-and-forth on March Banks Road I think the Increased traffic that will now access that area will add risk to those golfers crossing in their carts. There is no doubt that this big of a development will change the tranquil space and home to so many animals please ,this will end up being tucked right in to a neighborhood with Single family homes please consider finding a space that is tucked away and not near our parks or cutting through our neighborhoods
9.	Russell N	Walnut Creek, CA	I am a concerned Walnut Creek resident on adjoining property. It is a beautiful open space, one of few remaining in Walnut Creek and am concerned about this large development and its impact on our shared environment.
10.	Jodi D	Walnut Creek, CA	The project will have a direct impact on our park and our neighborhoods. The plans build out the entire natural area and require removal of over 350 existing trees.

11.	Donna F	Walnut Creek, CA	As a homeowner living along Kinross Spur, which will access the proposed development, this entry way is too small in size to handle estimated number of cars, emergency vehicles, delivery traffic. IF EVACUATION DUE TO FIRE or other disaster was going on the accessibility of people already living in surrounding neighborhoods would be threatened. This development should be on a major thoroughfare with proper entry/exits for size and scope of said development.
12.	Kristin S	Walnut Creek, CA	
13.	Natalya S	Walnut Creek, CA	
14.	Julie C	WALNUT CREEK, CA	we need either to keep this space undeveloped like we've done in the past with our open spaces or make plans to develop shorter buildings or larger lots that will last the test of time and not just serve retiring baby boomers short term. we need development that will be a benefit to the entire city.
15.	Don M	Walnut Creek, CA	Too much traffic and congestion on Marchbanks.
16.	Aaron W	Walnut Creek, CA	Traffic on Ygnacio is already terrible and this will be a large increase through Siskiyou and Marchbanks. Concern about additional load should Mt Diablo catch fire and sudden evacuation be necessary
17.	Oleksii T	WALNUT CREEK, CA	<p>There are two main concerns for me.</p> <p>First, we have an established architectural zoning in Walnut Creek which makes it look so beautiful when one is coming down to the valley from the surrounding hills. Multi-story buildings are concentrated around Bart and in the downtown and are surrounded by low-level homes. The suggested development project will break this layout adding a weird isle of high buildings. This is something that should definitely be prevented.</p> <p>Second, the new-coming residents will inevitably create additional pressure on the surrounding and the infrastructure. This will</p> <p>a) put the fragile balance of wild nature and visitors at Heather Farm and the adjacent open areas putting the rare wild species observable there into risk,</p> <p>b) additionally load the existing infrastructure adding traffic to already overloaded Ygnacio Valley Road and Treat blvd. The suggested design does not seem to provide any ideas on upgrade of motor ways coming to the site as well,</p> <p>c) the massive construction work required for such a large development project will bring in heavy building machinery and works at night for a long time that will have additional negative impact on the Heather Farm wild habitants and the neighbouring communities.</p> <p>Having considered the items above and a number of less urgent ones I am asking the Contra Costa County Board of Supervisors to deny the developer's application.</p>

18.	Gretchen K	Walnut Creek, CA	We don't need more congestion in this area. Preserve some open space, please.
19.	Carol A	Walnut Creek, CA	This beautiful area is in my neighborhood (down the street) and is probably the last big wild area in the middle of the city. Access to the area is on a two lane street (Marchbanks Drive) which could not possibly handle the traffic the proposed project would generate. It empties onto Ygnacio Valley Road which is already jammed with traffic. The land is home to a large amount of wildlife, deer, turkeys, peacocks and other smaller animals. Can't any open land be saved for future generations?
20.	Erin K	Walnut creek, CA	
21.	JOE S	Walnut Creek, CA	As a resident of Walnut Creek, just off Ygnacio Valley Road, I know that neither already crowded Ygnacio Valley Road nor the smaller streets connecting to the proposed development can accommodate the tremendous growth in traffic that the development would bring. While Walnut Creek, as well as other communities, must permit additional housing, that housing must be built in a way that does not degrade the community's quality of life. Any development of this property must also be carried out in a way that is compatible with the adjoining Heather Farm Park, bike paths and nature area. The current development plan would degrade the neighborhood, the adjoining park and recreation areas and aggravate greatly the already congested traffic along Ygnacio Valley Road and connecting streets. The proposed project should be rejected unless and until major changes are made to address these concerns. .
22.	Santosh D	Walnut Creek, CA	I live right at the proposed entrance to the development. As such, I see a lot of wildlife in the area use the protected land to raise their offspring and seek shelter in the urban sprawl. My son also goes to Seven Hills School and the distraction this will provide will be too much.
23.	Rosalie H	Walnut Creek, CA	Marchbanks is a two-lane street completely unequipped to handle ALL the traffic (other than the additional evacuation-only outlet) from this 450+ unit, plus employees, development. This location is ideal for single-family homes, s it is designated. Then there could be landscaping buffer for neighbors and open space. Also cutting 250 trees, many of then old native oaks, is a NON-STARTER! Do NOT change the county designation!

27.	Sarah K	Walnut Creek, CA	Walnut Creek is my hometown! I have loved this city and been a resident for almost 30 years now. Over the last 10 years, our expansive growth has taken away the charm of this beautiful gem. A massive compound right off of Ygnacio will make this already congested road even more so. The surrounding roads are not equipped to handle this. Marchbanks (where I currently live) is a small two-lane road, and that open space is a welcome sight whenever I take my walks in the morning. The beautiful Valley Oaks and all the wildlife need to be preserved. Please DO NOT move forward with this project.
28.	Kaylyn D	Walnut Creek, CA	As a long-time Walnut Creek residence, I have to say over crowding is becoming a real issue. We don't need any more traffic. We don't need any more housing ESPECIALLY near our beautiful park. No no NO to construction on this housing project.
29.	Tristan M	Walnut Creek, CA	
30.	Fred S	Walnut Creek, CA	Please don't destroy the environs of our precious Heather Farms Park.

33.	Jeff V	Walnut Creek, CA	We do not need more crowded housing in Walnut Creek.
34.	Joshua D	Walnut Creek, CA	Those lying bastards
35.	Jodi F	Walnut Creek, CA	
36.	Bob C	Walnut Creek, CA	Growth in WC is out of hand. It is essential to retain the existing undeveloped or lightly developed parcels as is, especially in the non downtown parts of town. Adding a very large development almost adjacent to Heather Farm park and the Gardens is very much out of step with that area.
37.	Kristen L	Walnut Creek, CA	I live along Marchbanks, and in my Zoom call with the developers, it was explained that the entrance and exit for this complex will go through the stop sign at Marchbanks and Kinross/Club View Terrace. There will be 300 employees a day going through that intersection, along with delivery trucks, visitors and residents. This is far too small a street and intersection to manage that many cars a day. Either additional non-emergency entrances/exits need to be planned, else a smaller development.
38.	Ankita G	Walnut Creek, CA	We live a block away from this proposed settlement and do not think it's acceptable - Heather farms is a quiet community with very little traffic. We purchased our home because of this neighborhood and do not want it to change as it will directly impact our day to day lives.
39.	Marie D	Walnut Creek, CA	We need to protect our parks and open space. There is too much unnecessary development in Walnut Creek. We need to protect our quality of life.

40.	Tinamari C	Walnur Creek, CA	My children and I use the paths and trails at Heather Farms every day. I was shocked and dismayed when I learned of the plans for such a major development right there and I share everyone's concerns about traffic and safety, also the animals that will be displaced and affected.
41.	Philip J	Walnut creek, CA	We use the trail which crosses Marchbanks almost everyday and twice a day when school is in session. Marchbanks is already a small highway at times. This would make not only our neighborhood but the Heather Farms park and Rec area more dangerous for families.
42.	jill s	walnut creek, CA	I live in the immediate area of the proposed project and traffic on Ygnacio Valley Road (YVR) is already awful. With YVR as the only inlet/outlet to this development and considering the large number of occupants it can house it is easy to deduce that this will add enormous strain on YVR. This added traffic will greatly increase the commute time for those of us who work & therefore makes our homes less appealing (aka less valuable) due to the amount of time it will take to get to a major highway, not to mention downtown Walnut Creek. The free space is getting less and less and having worked with ABAG I understand the importance of trees & green space for our water flow, air quality and overall happiness. On that note I am also aware of the burden on the City's sewage & storm drain system such a development will bring. Likely our system was built without this additional amount of usage anticipated nor the additional amount of impervious surfaces considered. I personally worked with the cities of a South San Francisco, Burlingame and Benicia with their ongoing & recent immense residential flooding situations in 2014-19 due to now inadequate drain capacity and poor planning. I mention this because it is costing those cities millions of dollars in lawsuits and claims of trespass, eminent domain & general negligence. Many of these types of complaints are not covered but your insurance pool's memorandum of coverage. Please be reasonable & require hydrology studies, reduce the number of dwellings and require the builder to set aside money for building and maintaining a larger green space to be preserved from development.
43.	Craig C	Walnut Creek, CA	If the City officials approve this plan it will only show big business has more influence on them than the good of the city and the people who live here. Any reasonable person would plainly see the developer is trying to stuff as many units as possible in order for max returns at the expense of safety and community.
44.	Ronald C	Walnut Creek, CA	This is not appropriate for the neighborhood. Obvious traffic concerns on Marchbanks an Ygnacio Valley Rd. Large multi story buildings are not compatible with protecting the <i>(continues on next page)</i>

45.	Gladys A	Pleasant Hill, CA	Heather Farm Park is to Walnut Creek as Central Park is to NYC. Please do not allow this complex to be built in what little remains of one of the historical sites of Walnut Creek\'s humble beginnings.
46.	Frank P. A	Walnut Creek, CA	Not consistent with area, creating high traffic volume on residential streets, heavy construction equipment in residential area, no easy access
47.	D E	Walnut Creek, CA	
48.	Debbie T	Walnut Creek, CA	Multi-story dwelling units with their own community within an established community of single homes seems like the character of the area will change drastically creating unmanageable traffic and more pollution in the area. It could certainly cause property values to change. This influx of people and cars could certainly affect the wildlife in the area negatively.
49.	Miri C	Walnut Creek, CA	As a new homeowner in Walnut Creek, I am really disappointed that the City or County failed to officially inform their residents about this potential drastic change to our community. My family chose to move to Walnut Creek due to its balance of citylife and nature, and its thriving population of young families. Having a development of such density near our schools and homes will take away safe and quiet roads. Does Walnut Creek really need another Rossmoor? Do we need an establishment that is isolated to a narrow age and income group? My family and I care about bike safety as well, the increase of car traffic In and out Marchbanks and Kinross is already overwhelmed in pre-Covid days; drivers speeding and passing stop signs and red lights are far too common on Marchbanks/YVR. The city clearly does not have the infrastructure to support more vehicles in this neighborhood. If unfortunately this proposal gets passed, I am also very concerned about the air, noise, and land pollution coming from the construction site in the next few years; It is not mentioned in the proposal how our residents (and our wildlife residents) will be protected from the excessive dissonance. Knowing that there will be studies conducted regarding the current surrounding conditions (such as traffic and noise). I would like to urge the city and the county to postpone any studies until we arrive the Minimal risk level https://covid19.ca.gov/safer-economy/ . The test conducted in 2020-2021 will not be accurate to inform our actual neighborhood\'s needs. <i>(continues on next page)</i>

61.	Carol M	Walnut Creek, CA	This huge development does not belong in this quiet neighborhood, and will ruin the serene nature of Heather Farm park. The 600 proposed units will have worker and owner traffic, vendor delivery traffic, ambulance and fire department traffic, visitor traffic and so forth. The traffic from numerous park activities will intermix with all of this, along with existing Marchbank tenants. Please do not approve this development!!
62.	Marcela T	Walnut Creek, CA	
63.	Paige M	Walnut Creek, CA	
64.	Kathleen C	Walnut Creek, CA	I live in the Heather Farms area and we have only one way out of our neighborhood. This development would increase traffic flow and endanger lives in the event of an emergency evacuation. Build single family homes only.
65.	David B	Walnut Creek, CA	Open space needs to be preserved. We cannot keep crowding in developments into every nook and cranny. Affordable housing needs to be added to the Walnut Creek stock. And there is no way this is safe giving the location. Adding more traffic to Ygnacio Valley road is also not helpful.

70.	Sarah L	Walnut Creek, CA	This will negatively impact our neighborhood regarding noise, traffic, construction pollution, natural habitats, etc. This beautiful land should be left alone but at the very least be developed into something much smaller...
71.	Morgan M	Walnut Creek, CA	
72.	Jennifer M	Walnut Creek, CA	
73.	Joseph B	Walnut Creek, CA	The city must develop in a holistic manner meaning schools, roads, public services, etc need to keep pace with residential growth. Walnut Creek shouldn't just chase development dollars like this. The community suffers as a whole.
74.	Alice L	Walnut Creek, CA	Open space is so very important for families in and surrounding Seven Hills Ranch area Please preserve as much is possible. Rossmoor is a good example but building on a smaller scale. Thank you.
75.	Richard S	Walnut Creek,, CA	I am not against reasonable development of the Seven Hills site, however, I believe development, height limits and population density should be the same as surrounding neighborhoods. The high density development adversely affects traffic access, noise abatement as well as obstruction of views with excessive heigh limits. The County should not alter the General Plan to exclusively benefit the land developer at the expense of the interests of the larger community. The General Plan can be modified to allow development consistent with the surrounding community. Such reasonable and sensible development who still allow the developer to have a reasonable profit from his/her investment without allowing excessive profits to the detriment of the community. Even those residents who would reside in the new development would profit by a lower housing density and height limitation resulting in a more livable and pleasing environment.

79.	Colleen B	Walnut creek, CA	It is so critical to maintain open spaces for people to enjoy. Please leave the land as it is.

85.	Carolyn P	Walnut Creek, CA	Please be responsible with the remaining green areas in and around Walnut Creek. Although well-intentioned, and possibly proposed given the proximity to medical facilities across the street, the negative impact outweighs the positive benefits for this area. Walnut Creek is already struggling with intense traffic congestion due to high density housing projects. As it is, emergency vehicles often have to drive a gauntlet to get the emergency room at John Muir. The impact of more traffic would only exacerbate the problem. Walnut Creek has already allowed more building in recent years than the city infrastructure can reasonably handle. I'd like to request a moratorium on development projects in Walnut Creek.
86.	Kymberly J	Walnut Creek, CA	Whether it's gardening in our plot at HF, or attending school at Seven Hills, or walking the trails... our family uses the impacted every single day. 101.	Ray R	Walnut Creek, CA	
102.	David M	Walnut Creek, CA	This development, as proposed is way out of step with the building density and heights of the surrounding areas. It is not a good fit for this residential area. Not sensible. The county should not change the General Plan to accommodate the developer.

113.	Doug M	Walnut Creek, CA	Important to maintain neighborhood character.
114.	Maureen M	Walnut Creek, CA	The land provides a habitat for foxes, deer, coyotes and, of course, the omnipresent wild turkeys. There is at least one pair of hawks that nest on the land. Hawks often have several nests. We have been lucky to observe baby hawks as they develop. I love the sight and sound of baby hawks whirling and swooping in the air once they learn to fly.
115.	Hope E	Walnut Creek, CA	It will negatively impact residents quality of life. Traffic is already impacted here and it's only going to get worse. This open space is a home for animals and digging up all the soil relocating it and tearing down the natural setting is criminal! The land is zoned for single family homes and agriculture. If every time a big developer wants to put up a huge structure they can just come in and challenge the zoning regulations and change them to their benefit what's the point of having these laws and regulations in the 1st place. Please keep this land the way it was meant to be zoned for single family homes and agricultural space. Keep Walnut Creek beautiful!
116.	Janet M	Walnut Creek, CA	I live in Walnut Creek and am sick of all the development. Stop letting the developers ruin our city.

119.	Eva D	Walnut Creek, CA	I live in a condo (multi-family) but too much multi family housing is not a good thing. We need balance and single family homes are very important for that balance.
120.	Gloria B	Walnut Creek, tc	The city has over populated the city long ago only to insure more money in taxes. Now talk of defunding the police so how do we co trol speeding and safety. Many streets have already become cut thru s and will increase due to overcrowding on Ygnacio and Treat, they are not freeways. Last, water restrictions and power outages will be next to add to our already stressed load.
121.	Thomas B	Walnut Creek, CA	Walnut Creek has allowed unchecked commercial and residential growth for years to increase revenues from propefty and sales tax. The result is populaton overcrowding and grid lock traffic. Ygnacio Valley road is also a main commute corridor and deterrent to living in this area. The County will be used as a Shill to get this development built and the City will then Annex in a deal with the County, similar to San Ramon and other development projects throughout the County.

127.	David B	Walnut Creek, CA	Marchbanks already is has higher density than most of Walnut Creek. The area immediately to the West on Civic/Oak Road Is already high density. Adding another high density project in between these two would only exacerbate existing issues in the area. Why does the County Supervisors care more for potential new neighbors rather than address the needs of current ones?
128.	wayne w	walnut creek, CA	There is not proper access to this site. The traffic during construction and after completion will overwhelm the current streets.
129.	Anonymous	Martinez, CA	Retaining open space in our cities help keep them from becoming stifling and leads to improved wellness for all.
130.	Anne W	Walnut Creek, CA	I live off Marchbanks and feel that this project would put too much traffic on the road and there we know of no study that was done to confirm that any development of any size would not overwhelm the neighborhood.
131.	Steve B	Walnut Creek, CA	
132.	Natalie W	Walnut creek, CA	My favorite serene area to walk in WC where I often see deer and turkey's. The neighbors are always friendly. A large development would be heartbreaking and would completely, negatively alter the energy of the area.
133.	Julie F	Walnut Creek, CA	We support some housing in this location but the density proposed will greatly impact the neighborhood (visually and noise), nature and traffic. Please be reasonable in approving something that allows for some growth and housing but does not allow for such high density in a place that is in the midst of a single family home neighborhood. Traffic and access to our country road so close to downtown is already greatly burdened.
134.	Lauren F	Walnut Creek, CA	Too much congestion on Ygnacio Valley Road. It's OK for Walnut Creek to have some open space... that's why we live here.

136.	Kathy C	Walnut Creek, CA	Traffic on Ygnacio Valley Road is already absolutely horrible at all hours of the day. Adding a complex of this size will worsen it. 145.	Cynthia G	Walnut Creek, CA	We do not have the infrastructure to support another large development that will destroy more natural landscape and open space and create more traffic in Walnut Creek. WC has more than contributed it's fair share of new housing in CA. already.
146.	Anthony G	Walnut Creek, CA	Controlled growth
147.	James C	Walnut Creek, CA	I would support a special Walnut Creek tax for the city to buy and preserve this land as open space. Big money developers have already used the state to circumvent city zoning and create congestion. Please do not let the county do the same thing. We are supposed to have a government, not an auction
148.	Maureen W	Walnut Creek, CA	Walnut Creek is already too crowded and congested. The development that has been done in the last eight or so years has destroyed the once charming downtown and created a traffic nightmare. It seems the developers now want to branch out from the downtown area to continue to destroy the rest of Walnut Creek by even more development. Please do not amend the General Plan to accommodate developers and sell out our city for the money. Enough damage has already been done.

153.	Sharon P	Walnut Creek, CA	Heather Farms Park is the Grandeur in eastern Walnut Creek. I have been walking the park weekly for 35 years. It's is a hub of wild life that needs to be protected. People with disabilities are able to hike the flat area around Seven Hills. The Equestrian Center is a great place to jog the ring or train your dog or attend the exhibit of the Mini Horses. I have no interest in some mucky muck tearing out trees, leveling the topography, adding more roads with traffic circling the park or abusing Cherry Lane, just to have a view of the mountain.

172.	Diana B	walnut creek, CA	HF is a community hub (playground, sports fields, walnut festival). Adding traffic that flows through it will endanger children.
173.	Thomas W	Walnut Creek, CA	Traffic congestion is already a huge problem on Ygnacio Valley Road. There isn't sufficient infrastructure to build high density housing unless more roads are built to connect to freeway on-ramps. It's a poor choice of location for high density housing.
174.	Nancy O	Walnut Creek, CA	We need more nature walking trails not traffic and unsightly buildings!
175.	Gloria F	Walnut creek, CA	We need to protect what open space we still have. Ygnacio valley rd is already over crowded.

178.	Sigrid S	Walnut creek, CA	The traffic generated alone would exhaust the already crowded and noisy city streets! The Walnut Creek we know will be gone forever. Allowing for Developers greed will take away quality of life for its residents and reflect poorly on city leaders!!! Heather farm would be greatly affected- the only park in walnut creek!!! Act sensibly- protect the environment!!!!
179.	Alexander T	Walnut Creek, CA	Before the pandemic both Ygnacio Valley Rd. and Treat St. was jammed with the traffic during the business days. It will be worse after the pandemic ends because of more people living in WC now plus the multiple developments like the BART Village and this one. So the new development will aggravate the situation. We also need to preserve the parks and wilderness. We pushing the wild animals far and far away with no place for them to live. The infrastructure around the planned development is not ready for those people who will live there. I see no plan to address that. I really don't want Walnut Creek to become Fremont-lite where the massive development of the land near Tesla plant has become the real problem for people living there before and has the significant impact on the traffic without any meaningful solution. The traffic on Marchbanks St will increase as well - visitors. The same is the impact on the parking on this street.

191.	Pam L	Walnut Creek, CA	Too many people, too much traffic. For those of us that live off Ygnacio Valley Road, this will cause a traffic disaster. Be realistic. Quit being so greedy. These condos and apartments have added so much traffic to the already congested ygnacio valley road. In the late afternoon before pandemic, driving from north main on YV to Heather farm in San Carlos drive can take at least 30 minutes (a short distance of less than 2 miles). Adding another 451 units will turn the traffic in this area into a nightmare. 238.	Tami L	Walnut Creek, CA	As a Walnut Creek resident, it is distressing to see the massive amounts of development that has occurred recently in our city. From high rise apartment buildings in downtown and a huge senior center going in behind the Orchards shopping center. Why add more high density housing and add to already overcrowded roads? As I understand, there will be only one way in and out for a 400 unit building. Has an environmental study been completed? What about leaving some open space and not making Walnut Creek all concrete? The condos near the corner of Sierra and Walker is an example of development that has destroyed a neighborhood and impacted property values of longtime residents.
300.	Ariadne P	Walnut Creek, CA	I oppose this type of development in this area for the following reasons: Additional traffic on an already overly busy access road; Adding of 660+ people to our already stressed medical infrastructure; greater need for LOW_COST housing for younger people who will continue to contribute to the greater community (I can say this as I am a long-term resident well over 60); the developers are only interested in high end clients (look at website and where they have previously built CCRCs); no commitment to less wealthy end of scale client; no solar (except for pool); could make this a LEAD development but chose to take the minimum \"efficiency\" road; way too little ingress/egress planning for emergencies (How do you get all those people out if fire/earthquake). Plain and simple, this does not meet any diversity, open space, energy efficiency, water use reduction needs of Walnut Creek or CCC. It is a bunch of land developers (need I mention not one of color or of the female gender) who only want to develop high-end developments where they can make lots of money and have no regard for diversity or of the fact that we need affordable housing not another mini Rossmoor. Totally against.

306.	James R	Walnut Creek, CA	Access to this parcel of land is very limited for such a high density development. Traffic through Heather Farm Park would be far too high, and dangerous for park users. My wife taught at Seven Hills School for 27 years, and our daughter attended for 8 years. Traffic would impact the school too. The project is just far to big and too dense for a property with such a rural character.
307.	Leslie G	Walnit Creek, CA	I have lived in WC for 25 years and have watched as a beautiful quaint place to live has given way to a major city with major city problems. Traffic (pre-Covid) has become gridlocked and a simple trip to a nearby doctor or store has tacked on 15-20 min and a lack of parking. More people means more crime its a fact of life. WC has not built up its infrastructure to support all the new developments here. Police and fire are still the same as they were 25 years ago....I know, I was a CCC fire fighter and the entire dept is still grossly short staffed.

The County has an opportunity to provide sensibly managed housing, mixed-use, and new open space for its constituents. Hundreds of new housing units resulting in potentially 1000s of new daily vehicle traffic on Marchbanks will only worsen conditions for neighbors and anyone who commutes on YVR (as that is the only planned way in or out of the community. I strongly oppose the massive compound proposal submitted by the developer SPK.

352.	Mike Y	Walnut Creek, CA	This proposed Spieker 360 unit development, right next to Heather Farm Park is an abomination. Leave the zoning alone. The Spieker plan also calls for four story high buildings! This would be an elder care community with resident cars, service trucks and emergency vehicles in the hundreds funneling through one entrance, Kinross Dr. The surrounding neighborhoods and Marchbanks Dr. would be overburdened. I live next to the development, and find this proposed project to be a complete misuse of a beautiful piece of property and to be an unfair intrusion on our lives and of no benefit to Walnut Creek.
353.	Linda L	Walnut Creek, CA	I am a 14-year resident of Walnut Creek, residing next to Seven Hills Ranch. I am opposed to an amendment to the General Plan to allow the Spieker development of this property. The proposed development is too massive and dense for the surrounding residential neighborhoods and would cause more traffic and noise.
354.	Matylda R	Walnut Creek, CA	The proposed development will drastically congest our neighborhood. In addition, some drivers might choose to drive on Kinross inside our private neighborhood which will put our kids in danger. Also, the new development will decrease our home values.
355.	Bogdan K	Walnut Creek, CA	Walnut Creek needs more single family houses, not massive developments in the middle of residential areas. This development is going to turn a charming suburb into a concrete-covered city. To get to this monstrosity, new residents, employees, and contractors will have to drive through already congested Marchbanks Dr. or cut through the private Kinross Dr., on which our kids are playing. Our neighborhood is not going to be safe for families anymore.
356.	Barbara G	Walnut Creek, CA	
357.	Beverly D	Walnut Creek, CA	I'm a neighbor. I don't want a commercial enterprise such as this invading our residential areas.

Development in WC has burgeoned in the 18 years I've lived here, and the increased urbanization has diminished the quality of life. 415.	Brian G	Walnut Creek, CA	I appreciate the peaceful beauty found in Heather farm Park and cannot imagine if being vastly changed by the building of this jumbo-sized development. Too many units for the size of land. The land use has already been clearly established and should stay the way it was designated. In addition people traveling through the area on Ygnacio boulevard will be impacted by the increase in traffic. People working on it The city and county need more open space not less.
416.	Carol W	Walnut Creek, CA	Open space. A return to a natural creek. Housing should be dense at transportation hubs, not creating more suburbs.

422.	Shoshana W	Kensington, CA	Now more than ever we need to preserve our last remaining open space and halt any further development that increases traffic, pollution, and the fire risk inherent in wildland-urban interface. Either we learn from our past mistakes or we face further tragic consequences. Please, Board of Supervisors, deny this application for land use designation change. It's time to stop runaway development—and bring a creek back to life.

437.	Judith S	Walnut Creek, CA	Previous Board Members made a wise decision to create Open Space in Walnut Creek to enhance our quality of life. Do not chip away at our quality of life by relinquishing Open Space to development.

This land is so beautiful and peaceful. It would be a shame to close it in like the rest of Walnut Creek. It will not only spoil the land, but also the views, the quiet, the home for turkeys and other animals. Not to mention traffic impacts on Ygnacio and overcrowding in the schools. 473.	Elizabeth H	WALNUT CREEK, CA	With limited water in Calif. we can not keep adding people, traffic, congestion and refuse. Replacing nature with concrete and massive developments is ruining the quality of life and depriving people of the benefits of quiet, calm neighborhoods. The trend toward working from home will allow centralized office space to be converted to living space. Pursue retrofitting buildings vs. more construction. Also, studies show that new developments bring up front money, but after 20 yrs the maintenance costs of the development become a burden.

As a retired City Planner with over 30 years experience in the Bay Area, I believe the existing General Plan should stand. Amendments to the General Plan are limited for good reason, and the proposed amendment does not address adverse impacts on the existing land uses in the immediate vicinity nor does it provide any evidence that the development would be beneficial for the City as a whole. The park and specifically the equine center component is unique and frankly I don't understand why it hasn't been landmarked yet.

A development of this size would be the death knell to the Equestrian center and would severely impact the traffic on Ygnacio Valley Road — and beyond. The city of Walnut Creek is trying to reduce the number of cars by 15% for any new development. this location would require a mass transit infrastructure that doesn't exist to sustain a community of this size. 574.	Ana B	Walnut Creek, CA	We value the balance of natural spaces in Walnut Creek and the preservation of areas such as the heather farms and seven hills meadow property.
575.	Thomas C	Walnut Creek, CA	With the development as currently planned having a single entrance and exit via Marchbanks (with two emergency exits elsewhere), I believe it is irresponsible to increase the number of residents and associated support services in an area without increasing the ability for the surrounding streets to handle the associated increase in traffic. In order to handle this responsibly, at the very least the developers should be required to provide additional ingress and egress solutions for the new facility. Adding hundreds of round-trips into and out of the new development will compound the issues of traffic on Marchbanks, Ygnacio Road and Heather Farm park, which creates a safety issue. It's not clear that the city understands the limits of Marchbanks and the surrounding streets (one of which is private, and one of which does not allow a left onto Ygnacio) at the intersection that's the main entrance to the <i>(continues on next page)</i>

576.	Mavis S	Walnut Creek, CA	This development would heavily impact Ygnacio Valley Road and its arteries which are already heavily traveled and become dangerous during commute hours.
577.	Linda G	WALNUT CREEK, CA	Unwanted, noise, traffic, parking, more breakins, not environmently friendly, entrance-egress issues.
578.	Kendall D	Walnut Creek, CA	As a long time resident of Walnut Creek, I've seen this area grow and become more overcrowded. We don't need more development, we need to preserve the natural spaces as they are. One of the reasons I love this area is because of the amount of open space we do have and I don't want to see more of it disappear bringing excess traffic.
579.	Sandra C	Walnut Creek, CA	To save open Spaces.
580.	Deborah F	Walnut Creek, CA	Too much development in Walnut Creek. Traffic is already too congested. Preserve our open space to retain Walnut Creek's beauty.
581.	Debbie T	Walnut Creek, CA	The over building of Walnut Creek has to stop! Living here is becoming less and less enjoyable as projects like these are approved.
582.	Barbara M	Walnut Creek, CA	I live very close to this site and often go out to enjoy Heather Farms. I wish this area be saved in its natural state for future generations.
583.	Don H	Walnut creek, CA	Omg. I walk this area regularly with my daughter and have been doing so since she was TWO!!! This is one of the gems that makes walnut creed so ridiculously AMAZING. This development idea is a farce and greedy tragedy.
584.	Stephanie T	Lafayette, CA	My children go to school at Seven Hills School and we use Heather Farms Park. This is a beautiful space for children to learn and grow... NOT another development.
585.	Lee C	Walnut Creek, CA	Please say NO to this proposed new development. I have been a resident here for almost 30 years. Please consider our peaceful surroundings and this beautiful piece of untouched land. I just can't imagine having construction trucks barreling down Marchbanks for months on end as it's being built. I know I will lose the peace I've been grateful for and most likely will have to move away. Please say NO to this developer.
586.	Poria A	Walnut Creek, CA	I've been a resident of Walnut Creek for 33 years and while there have been some amazing changes and developments I have serious concerns about overdevelopment. We do not need more housing. The roads, schools and public utilities are stretched so thin as they are.

589.	Karen W	Walnut Creek, CA	Please delay action on this item until more community input is received! The current John Muir medical center construction is ongoing and disruptive. Beautiful old oak trees were ripped out of the ground and a large piece of land that was home to local wildlife will be replaced with a huge parking lot. JMMC owns the land and of course we expected it to be developed some day, but it is heartbreaking to witness. I feel the same about the seven hills ranch property.

594.	Colleen S	Walnut Creek, CA	Have lived here 14 years. Very unsafe to have a large population of people living with unlimited access entering and exiting the neighborhood! Will create extreme traffic congestion. Unacceptable to cut down the Majestic Oak Trees which are to be preserved in Walnut Creek and California!

During this COVID-19 period open space has become very important because many people don't have yards or space available. It will also impact wildlife in the area. 604.	Richelle P	Walnut Creek, CA	We need to stop the development in WC. We need to save the open space and keep the little wildlife that is left. I'm tired of the low income house, and multi story buildings that are taking over Walnut Creek. This land and open space at Seven Hills needs to remain as is with no development. We like the vacant land. We don't want buildings developed on this land. Stop the development!

606.	Mary Ellen D	Walnut Creek, CA	Once Covid-19 has been conquered this town's citizens will have been through a dizzying and ever-changing set of frustrating restrictions. But they were made for a good purpose: to protect our health. The last thing we want to look forward to is MORE TRAFFIC all around YVRd and Marchbanks. In what way would this development serve your current citizens? Please follow the example of Save Mt. Diablo. Save this little 7 Hills property as a park. Give us some hiking trails and open vistas in which we can maintain some source of inner peace. Nature heals the soul. Construction and crowding destroy it. Is that what you want to accomplish for those of us who live in that area? Mary Ellen Dalgaard Resident of Wiget Lane since 1976
607.	LINDA H	WALNUT CREEK, CA	I have lived here for 28 years and cannot count the number of times I have been to that very location. It is beautiful & peaceful & amazing. I looked at the developer's proposal and the planned CCRC is huge. It seems Walnut Creek is being developed everywhere which is horrid enough, but please, please, do not take away this site too. If this goes forward, the entire character of the area would be lost forever. Do not replace this refuge that our community needs with this CCRC with 350+ units and multiple other structures that we do not need.

625.	Walter P	Walnut Creek, CA	I am concerned about many things including greatly increased traffic on narrow and quiet neighborhood streets, destruction of open green space in the community, degradation of surrounding habitat and water quality, increased density in an otherwise moderate density area, increased pollution, etc. More and more development on the increasingly smaller and fragmented open space in our community should not continue just to add tax base. The council should not approve this plan.

642.	Cynthia C	Walnut Creek, CA	I fear the traffic and crowding around Heather Farms will increase. If the project proceeds i would like to see a different access besides Marchbanks/San Carlos. There are a large number of cyclists, pedestrians and children playing in this area. I worry about their safety and the threat to the quietness of my neighborhood.
643.	Lorraine R	Walnut Creek, CA	It is a huge development and should have time for many open sessions for residents to discuss. Perhaps there is a way to have this be a much smaller project and save open space as well. The Shadelands Safeway project had a lot of community concern and resistance, and has never been totally leased and did not fulfill what was promised, but eliminated some lovely open space. Once it's gone it won't be back!

647.	Maurizio S	Walnut Creek, CA	There would be only one access to this planned development which is not big enough for our small neighborhood- I have lived in the Heather Farms community for over 23 years and this proposal would drastically change our residential neighborhood. 649. 674.	Kim J	walnut creek, CA	Walnut Creek has a unique charme. We still have that country feeling in most of our neighborhoods despite the very urban feel of downtown. There\'s development everywhere, bigger and bigger. I understand that we need housing but at the same time I don\'t want to lose what makes living here so special and enjoyable.

677.	Betsy K	Walnut Creek, CA	I grew up in Walnut Creek and attended the Seven Hills School as a child. The open hills are what makes Walnut Creek such a desirable place to live and we need to what few hills we have left. Adding more housing to this already busy street doesn't make sense.
678.	Lucas M	Walnut Creek, CA	Walnut Creek needs to conserve natural areas to benefit the health of our community.
679.	Marina B	Walnut Creek, CA	This will make the traffic on Ygnacio Valley Road much worse and adversely affect air quality and the environment.

683.	Christopher K	Walnut Creek, CA	Growing up in Walnut Creek and going to the seven hills school - this open space is important to the community and provides a balance of development and open space that makes this community unique and special - giving up more open space strips Walnut Creek of that balance.
684.	Holly L	Walnut Creek, CA	This area is already densely populated compared with other parts of Walnut Creek. I am concerned about increased traffic on Marchbanks and pedestrian safety.
685.	Jack K	Walnut Creek, CA	All three of my children attended Seven Hills School.

687.	Kristen D	Alamo, CA	My children go to school at Seven Hills
688.	James C	Walnut Creek, CA	
689.	Gail T	Walnut Creek, CA	It would ruin the area and the entire Heather farms. And Add too many people to an already congested area. Parking and entrances would be destroyed. So so many things wrong with this
690.	Lillian L	Walnut creek, CA	Part of the attaction of living in my area is decreased congestion of cities and land development. Unfortunately the city of wc has somehow sided w developers and many condos that being erected in areas surrounding us. We love the nature that is around us and don't want more traffic coming through and around our neighborhood. Right now our kids can ride their bikes safely. Neighbors can walk without constant drive through traffic. We can bike snd enjoy the scenery. In addition our school seven hills will be affected.
691.	Kathleen C	Walnut Creek, CA	We need to preserve what undeveloped space that is left, especially this area.

692.	Linda D	Walnut Creek, CA	This development is within walking distance of my house. I can just imagine the amount of traffic this will generate in my quiet neighborhood. The change in the topography and eliminating over 300 trees should be enough information to ban this project. DO NOT change the current zoning. We do not need a multistory complex disrupting access to Heather Farms. This would not be a good development for Walnut Creek.
693.	Tim D	Walnut Creek, CA	We live close to the proposed development & do not welcome any more congestion.
694.	Lisa M	Walnut Creek, CA	This development is massive and will impact the surrounding neighborhoods with too much traffic, congestion, noise and air pollution, as well as destroy natural beauty and space for trees and wildlife. This is a small city with a lot of high-density development. It's time to discuss responsible development and quality of life before it's too late.
695.	Yulia K	Walnut Creek, CA	
696.	Ginger M	Walnut Creek, CA	
697.	Pat M	Pleasant Hill, CA	We walk these trails ...it's part of the park and fields atmospheric. It's beautiful and enjoyed by many folks every day in wildlife. Walnut Creek has become overbuilt and the traffic in that area is already too much. The city is rapidly losing its charm and appeal with so much development
698.	Diana H	Walnut Creek, CA	Please do not destroy the beautiful land. It deserves to be preserved. Also, it would cause severe traffic that we already have on Ygnacio Blvd. Marchbanks would not be able to support it either.
699.	Lainie J	Walnut Creek, CA	Trees, parks, and natural spaces are what make neighborhoods desirable. Walnut Creek will not benefit from more congestion on Ygnacio near existing parkland and the hospital. We should protect and preserve what natural and historic land we have with an eye toward green, community-minded revenue & benefits rather than selling it off for a short-lived profit at a cost to our quality of life. Thank you.
700.	Christine B	Walnut Creek, CA	This will increase the amount of traffic on Ygnacio Valley rd. With increasing traffic brings car idling and increase of pollutants to the air bad for people and bad fir the environment. I have lived in Walnut Creek for 20 years and love the opportunities to get outside on the bike trail and Diablo foothills - enjoying nature and the beautiful trails that are endless. Please consider how much building we have in all over town and our streets are so busy, schools at capacity, even the bike trails are super busy with commuter, cyclist, runners, walkers with minimal opportunities for social distancing and more incidences of injuries and crime.

701.	Nancy S	Lafayette, CA	Time to stop the building! People need open space to live sustainable life styles. Families aren't looking for apartments and condos, they want single family homes. Just look at what is happening in SF, OAK, etc.. People are leaving for urban life! Bottom line is , yes there is demand for housing, but California is not responsible for providing housing.for everyone who wants to move here. That idea is not sustainable. There are plenty of states who would welcome new people. With remote working capabilities it is possible. Stand up to developers!
702.	Jordyn K	walnut creek, CA	Don't tear down Mother Natures home. There is so much precious wild life that lives there! Also, there are so many kids that play on our block. The last thing we need is busy traffic coming through our neighborhoods!! GPS will direct them directly through our HOA. It's rare nowadays for kids to play outside period so let them have their fun SAFELY!!!
703.	Christina M	Walnut creek, CA	What is very special about this area would be ruined - development is unnecessary - other sites could be repurposed. Traffic congestion is a serious and worsening problem. Please consider alternative to this plan.
704.	Andrea B	Walnut Creek, CA	Our beautiful city is being destroyed by our county\'s disregard for our traditional zoning. Over sized homes being built on undersized lots are becoming the norm and are drastically changing our community\'s landscape.
705.	Shambhavi J	Walnut creek, CA	I've grown up in Walnut Creek and now 30 years later, my children and I still enjoy all the beautiful open spaces available. This is special land and should be treated as sacred.
706.	Sarah S	Walnut Creek, CA	We bought our home in Walnut Creek because of the trees. We speak for the trees, for the trees have no tongues. Do not destroy this open space. It is an irreversible mistake.
707.	Dee Ann T	Walnut creek, CA	This is not the right kind of development for this property. It should be sold to a developer that is going to parcel it to sell a small group of single family homes. The current plan would negatively impact the neighboring homes and also wildlife.
708.	Mia O	Walnut Creek, CA	There's a lot of wild life that will get displaced
709.	Glenn S	Walnut Creek, CA	Over construction of this project in Walnut Creek and the traffic it will cause is not worth the tax revenue it will produce. Sacrificing this open space and changing the building code zoning for this area will have grave consequences to this entire area!
710.	SAMUEL L	WALNUT CREEK, CA	This land should be protected for future generations. It will be a wonderful addition to Heather Farms Park and the city council who facilitate this will be revered for eternity.

711.	Joyce W	Walnut Creek, CA	This is one of the last few remaining large parcels of privately owned land and would be a detriment to lose any open space for more urban sprawl. For a parcel that is 13 acres in size, this type of development should be brought to the voters for discussion and/or any changes to amend the general plan, especially when the proposed development is Large scale. The loss of open space and wildlife would be a detriment to the city and the community as a whole. Please put this project on hold until the community can become more informed of the project by attending and speaking at City Council meetings. Closed door sessions are not good for the people, just developers pushing their agenda. This type of development should be put on next years ballot agenda and let the community have a voice too! Thank you.

717.	Deirdre T	Walnut Creek, CA	Growing up in this Area we have seen good choices and have seen many poor choices in regard to land use. It is one thing to increase the density of downtown Walnut Creek. Adding traffic ,social, personal and municipal needs to our available infrastructures. Asking tacitly for existing residents to adjust to the change in the tenor of life hereabouts. AT the same time it is the responsibility of the governing structures to set aside land and property to help absorb the needs of these new demands. In order to maintain the quality of life that draws people to live here in our area ONE must make strong efforts to preserve the reasons that folks want to live here. ONE major reason is in the balance of recreation, beauty and commerce. This property that can easily be meshed with Heather Farms is a clear opportunity to preserve the value that exists within our boundaries.
718.	Troy T	Walnut Creek, CA	This area of natural beauty needs to be preserved for the benefit of all current residents as we have been losing far to many of these places over the decades. Save this area for our current and future residents as it means so much to so many.

Also, we should be preserving out open spaces, for the animals that live in our community. I have absolutely against this Project to build at Seven Hills Ranch!
749.	Michelle W	Walnut Creek, CA	This development will negatively impact our city in so many ways. Displaced wildlife. Traffic issues along the already impacted YV Road. Heather Farms will be reduced and negatively impacted. Please stop this development deal.

806.	belinda m	Walnut Creek, CA	The entire area will be affected. Ygnacio Valley Road, the road that runs through Heather Farms and Homestead will see an increase in traffic. Homestead is already over used by drivers who consider it a thoroughfare. Please stop! The impact would only be negative.

808.	Susan F	Walnut Creek, tc	To save our hells and open space & keep Walnut Creek the beautiful town it is. Traffic on Ygnacio Valley road is already over capacity....think of the impact on traffic to current households.
809.	Allison B	Pleasant Hill, CA	As a lifelong resident of the 680 corridor area, I've spent a lot of time in Walnut Creek, at the Walnut Festival, shopping, and enjoying the excellent parks your city has cultivated. I appreciate the long-range planning Walnut Creek has done, which influences the feel of everything from traffic-light timing to the open spaces and trees the city has protected. Please consider that the value of this space is much more than what another housing development could match, and this parcel is irreplaceable once it's developed.
810.	Barry G	Walnut Creek, CA	I am not opposed to developing this parcel, as long as the development and impact are the right size for the site and surrounding communities. Be very careful with this.

817.	Sheryl H	Walnut Creek, CA	As a resident of Walnut Creek now for 4 years, and a prior resident of Concord for 8 years, I have to travel down Ygnacio Valley Road to go to both residences. I also use Ygnacio Valley Road to go to the new shopping centers at YVR and Oak Grove, and to go to my John Muir network doctor's offices. I cannot imagine the traffic on YVR becoming even worse than it has been for many years (pre-covid). I am unalterably opposed to the proposed project at Seven Hills Ranch. Traffic in this corridor is a nightmare at present and the impact on Ygnacio Valley Road would be disastrous. In the strongest possible terms I urge the City Council to reject this proposal.

834.	Aggie M	Walnut Creek, CA	Walnut Creek has become so dense and more and more urban. We need at least one park with wide open space. It is a fact that large parks with space benefit the psychological and mental health being of its residents. Do not overlook this critical need. There is also the fact that this city is becoming overcrowded, at what point will this stop? What do you want to turn this city into? As it is your own local residents avoid downtown and crowded areas. Is this what you have in mind?

845.	Kara G	Walnut Creek, CA	Ygnacio Valley Rd traffic would be a nightmare! This project is far too large for the site, especially considering the limited roadways. I live, work and run here in Walnut Creek. My husband commutes. Our kids bike the hills.

893.	Linden V	Walnut Creek, CA	This development is swallowing up the land adjoining the Wildlife Refuge at Heather Farm Park for overflow animals and birds, is adding to the congestion on Ygnacio Valley Road and all the local feeder streets, and will make Walnut Creek like every other suburb that puts development before open space. Why must every available undeveloped area become houses? Why can we not have an expansion of park space added to Heather Farm? Why can we not be a showplace for all kinds of space use? Why can't we include nature in our midst?

990.	E. S	Walnut Creek, CA	I am a long-time homeowner living in one of the communities which stands to be most impacted by this development. I have seen a number of projects unfold for over 2 decades and understand the ongoing need for city/county planning reassessment toward growth. However, this is the first time I believe that a development seems to only be for the benefit of the developer and, perhaps, a few hundred new residents, leaving thousands of residents of the established adjacent communities to deal with adverse consequences <i>(continues on next page)</i>

Contra Costa County, and the City of Walnut Creek to the extent of the need for their involvement in this project, should not hastily give in to nor accommodate the compromises, some being inconsiderate on the part of the developer, as the residents trust in them to maintain a sensible long-term vision. The developer's requests for modifying the current plan indicate that the project is not suitable for that space; in reality, it is an opportunity for them only - the equivalent of fitting a square peg into a round hole as developers need to do in these areas where land is scarce. Only projects geared towards the long-term well-being of the community should be considered.

Our wildlife is already lacking food and space and now we want to take away more of it. When we humans complain that wild animals come into our neighbor hoods looking for food and water we complain. But it is because of us humans that are taking away their habitats, and we blame them. Whats wrong with this picture.

1,031. Nancy B	Walnut Creek, CA	This development will funnel further traffic onto Ygnacio Valley Road (there are 517 parking spaces for cars proposed for the development); YVR is already gridlocked during non-Covid-19 time. Too much traffic! and too dense a development. This site has been marketed as housing for seniors but will not be for affordable for most area seniors (check out other developments by this builder). WC has an ordinance in place to save our trees and open spaces but this development is counter to those ordinances (requiring rezoning) and the wishes of the community. Our community does not want this development and the voters\' wishes must not be ignored to enrich a developer. Walnut Creek has more than done its share of providing additional CA housing; it is time to put a stop to further development of all kinds, especially this travesty being marketed as affordable housing for seniors.

I often wonder what San Francisco looked like before every square foot was covered with asphalt, housing and commercial buildings. Let's be the community that doesn't give in to greed. Let's preserve and protect the beauty that is the reason that many of us choose to call Walnut Creek home

The residents of the surrounding area have made their investments and plans for the future based upon the current provisions of the County General Plan. What then is the value of a General Plan if anyone can walk in and propose such a dramatic wholesale change. It's called a plan for a reason; it's called the constitution for physical development for a reason. Great concept but the totally wrong location. 1,359. Matt S	Concord, CA	Expanding the open space of Heather Farms into the Seven Hills open space would be a huge benefit to Walnut Creek! This is a unique opportunity to continue the strong Bay Area tradition of maintaining open space for future generations. Imagine if those before us had not done so with our East Bay parks, Mt. Diablo, Briones, and other open spaces. Had these been developed, like plans are being made for The Seven Hills Ranch, imaging what we would have lost with buildings, pavement, and development in these amazing open spaces. Preserve this space for all generations.
1,360. Jennifer C	Walnut Creek, CA	Development is an important part of a city\'s growth, and it needs to be done in a way that is responsible and adds value to the community. How does cramming hundreds of expensive housing units and business facilities into a modestly sized semi-rural area fed by small residential roads serve the long term interests of the city? It does not. Once the project is rammed through, the developer will make a lot of money, but the people who actually reside in the area, both current and future, both in existing housing and in the proposed new housing, will have to live with the poor decisions made by others, the most egregious of which would be a drastic difference in housing density between the developed area and its surroundings, a complete loss of open space that cannot ever be regained, and a missed opportunity to develop that land in a way that encourages diversity in the community.

This area would better serve everyone as park or community open space or something less dense that preserves the amazing nature that exists there.

On my walk from the Equestrian Center to my classroom, I frequently share the space with deer, turkeys, geese, and my favorite, the river otters. This serene and peaceful setting starts and ends my day with the comforting reminder that our connection to the land was here before us and is needed after us.

1,606. Laura L	Walnut Creek, CA	Our city is rapidly being overwhelmed. Construction on land that is a part of our history and heritage is unnecessary and simply wrong. It will add to our overcrowding and traffic issues. Lastly, my family (Lawrence's of Lawrence Meat Market) has lived in WC for generations - we must save what we have left of our natural land and keep the Developers out! Save our city from further unnecessary development.
1,607. Audrey A	Concord, CA	Areas around this land have already been developed or in process with high rise buildings. I.e The Orchards, Bart, downtown WC. Quality of life in Walnut Creek must be maintained and that means not developing every open land space which destroys environment, beauty and community. Heather farms and the area around is our one oasis left.

1,613. Leslie A	Walnut Creek, CA	We don't need more dense housing that blocks views of our beautiful hills and adds to the already BAD congestion in the area. I don't understand how we can keep adding more and more multi-level housing projects when the schools in the area are already overcrowded with no room to expand (as are other services). How can the city keep overlooking this??

1,615. Elisabeth M	Walnut Creek, CA	Save the trees that provide oxygen, clean air and cool the environment. Save habitat for other creatures. Preserve a beautiful area that isn't paved over like so much of Walnut Creek already is. Eliminate parking lots and more cars on Ygnacio which is already inadequate to handle traffic. Reduce crowding in open spaces for better quality of life.

Some species have even begun to reappear such as long-tailed weasel, badger, beaver, river otter, gray fox and so on .. The impact the building boom has had on our native species - number of animals being eradicated, poisoned, killed by cats, killed by cars, is growing and astounding. Why are we not protecting these resources for our future generations?

1,759. JEFF D	WALNUT CREEK, CA	Natural spaces are important to the health of a community. The logical, and most long-term beneficial use of this land would be to extend Heather Farms park and maintain the Seven Hills property as open space for all to use.

1,857. Christa D	Walnut Creek, CA	Existing infrastructure simply cannot support a development of this scale at this location. Significant traffic impact on Ygnacio Valley Road, potentially implicating emergency hospital access, not to mention an increase of traffic on YVR which has already been impacted by apartment/condo developments downtown. This beautiful open space should be preserved for community enjoyment, like Shell Ridge. Finally, this is not low-income housing, which is more sorely <i>(continues on next page)</i>

1,858. Laura U	Walnut Creek, CA	I want to save green space. There is already too much development in Walnut Creek. Developers do not live in the communities that they ruin.
1,859. Sherry U	Walnut Creek, CA	We need to retain some green space. The developers have over taken the city and completely destroyed the city. The traffic is a nightmare as it is and we need to look at ways to ease congestion not to add to the gridlock. There are multiple construction sites for housing already we don't need another one. Don't destroy Walnut Creek, don't approve this. I have lived in Walnut Creek since 1977 and I want to preserve the beauty we have left for future generations.

1,865. Tom H	Walnut Creek, CA	Mostly because this being an open space was the owners wish. Sheridan Hale wanted to preserve this space for all to enjoy. Especially all of the wild life which he cared for and always fed. It is already connected to an existing park and would be a natural continuation. Open space is becoming rare around here and we need to preserve what little we have left.
1,866. Eric B	Walnut Creek, CA	Conservation and preservation of open space must be a priority because once it's gone it will never come back. Seven Hills Ranch is a unique property - development must preserve the landscape and rural feel of the neighborhood and the conservation values of the nearby residents.
1,867. Pamela N	Walnut Creek, CA	We live on Walnut Blvd and our home backs up to Homestead. This development would cause far too much traffic for this area, substantially decrease our property value and our tranquil home life. We need to preserve all the open space we can in this City, especially with all the new building going on. This development would destroy our neighborhood. This area cannot handle anymore traffic or development.

1,877. Stella K	Walnut Creek, CA	The thing that makes Walnut Creek special, the thing that drives people to want to live here and shop and do a business is that it is a well run large community that feels like a small community with beautiful nature around us. Look to our neighboring cities and ask yourself which are more successful in revenue, schools, nature, housing? Is it the ones that are overrun by development? Or the ones I keep the small town feel and protect the nature around them? I want to keep Walnut Creek feeling like a small town, I am fully supportive of additional housing I think we need to focus on the properties that have poor optimization rather than to cut and burn the beautiful nature around us. We keep talking about affordable housing, but this development has nothing to do with affordable housing. It doesn't benefit Walnut Creek or it's community and it definitely doesn't solve problems with affordable housing or protect and value the nature around us. Our money and investment can be better spent buying existing properties and either renovating adding or demolishing and replacing old out of the structures within the same zoningz

2,314. Amy S	Martinez, CA	Too much density kills the environment. Ygnacio blvd can take 30-40 mins to get down. All that idling massively increases Carbon. Also, we need trees!!! Traffic is insane in Walnut Creek, we dont need a larger population. People bought homes in Walnut Creek because of the open space.

2,577. Ibrahim G	Walnut Creek, CA	It is not acceptable that one of the few remaining open areas near downtown will be completely destroyed and lives of 300 Seven Hills students and their families will be completely upended.
2,578. Kelly C	Concord, CA	As a former teacher and now a parent this is greatly impacting the surroundings of the school. The natural views we have now where our students can sit in the back patio of their classrooms will be taken over with buildings. We also are able to see and enjoy so much wildlife everyday. This will also have a huge impact on picking up students and dropping them off.

2,581. Christian B	Walnut Creek, CA	I value preserving nature over the constant destruction of land in the name of profit. Why not take every square inch of land in Walnut Creek and transform it into a means to make money? Because taking away open spaces to cram in more businesses and buildings will work to destroy the beauty of Walnut Creek - one of the very things that defines the city - a city that owns more open space per capita than any other community in California.

2,583. Shireen G	Walnut Creek, CA	I grew up in this area and went to Seven Hills myself. One of the things I hold dear to me to this day is the opportunity I had to explore, play in, and learn about the beautiful land and wildlife of Seven Hills and the surrounding area. The open space represents a part of many people's childhood, both past and present, and it would truly be a great loss to the community to replace it with buildings. We need to preserve our natural environments and open spaces, now more than ever. This project will mean more traffic, more consumption, more noise, and more pollution. Please don't allow this to happen.

2,619. Benjamin L	Walnut Creek, CA	Must we fill in every last bit of open space north of Ygnacio Valley Rd? Have we not learned from our past mistakes in land development? The communities surrounding Heather Farms and the Equestrian Center deserve some preservation of open space to benefit the generations to come. This is the last remaining space and a rather large swathe of homes.
2,620. Arnavaz G	Martinez, CA	Too much congested traffic
2,621. Tom K	Danville, CA	My child goes to Seven Hills School and this development will have a negative impact on the school.
2,622. Anonymous	Lafayette, CA	The proposed development in its current form does nothing to address the real housing issues facing our community and instead destroys one of the last remaining open spaces and natural estuaries in the area. There is a reason that Contra Costa County\'s current zoning does NOT allow for a project of this magnitude without an amendment to the General Plan. Put simply, this is not an appropriate level of development for this site and will have damaging, irreversible consequences to the neighborhood and broader community.
2,623. Lonnie F	Orinda, CA	Because Heather Farm Park and surrounding community need the open space so that residents have a local place to go for some solitude and respite from the rest of the world, including over built Walnut Creek.

Why ruin open space. There are plenty of places that need re development. What's Walnut Creek without all of the trees, hills and skies.

This beautiful and natural area is one of the last areas that residents can cherish. Please consider saving it instead of inviting more buildings and traffic. Leave it and its wild animals alone
2,652. Laura B	Pleasant Hill, CA	We are losing too much open space, Walnut Creek can afford to keep natural spaces. Are we so poor that we HAVE to sell any and all natural God given, beautiful space? Please leave the land as it currently is
2,653. Russell W	WALNUT CREEK, CA	Keeping open space open, or if it is intended for single family homes, then keep it that way. I do not agree with commercial style or condensed housing properties that are being proposed or built in WC. The current infrastructure cannot support the increased population this will produce, schools are already lacking, roads/traffic is in dire need of attention.
2,654. Kathleen O	Walnut Creek, CA	I have lived in this area for most of my life. I'm 73. I remember all of the walnut trees that lined Ygnacio Valley road. I have walked on this plot of land a few times. It smells and feels like a walk in the countryside. I was born in California. Let's save what we can.
2,655. Diedre C	Walnut Creek, CA	Please leave this beautiful area as is. Too much building happening in Walnut Creek as it is. Seeing an increase in deer hit by on Ygnacio. Increase in construction trucks/equipment plugging up traffic. Our beautiful town is becoming one big construction site. 2,657. Susan R	Pleasant hill, CA	This is important to me because we need these open spaces to be preserved and not turned into more housing, more facilities, and more parking garages. I think Walnut Creek has been developed way too much already.

2,670. Eric Hans B	Walnut Creek, CA	We used all of this open space when we lived in Bancroft Village. We will use this area even though we now live in Rossmoor. We value this open space. It adds to the attraction to Walnut Creek as a great place to live, work and play. With all the in-filling already occurring, we need to retain some open space. We are in danger of becoming a over-built city. I am an environmental and land use planner by training and past practice. This development does balance urban life and environment. It will dominate it and reduce value of surrounding parkland and recreational value. I do not own any property or direct stake in this neighborhood; I sign this petition today as a resident of Walnut Creek who wishes to have a wonderful city to live.

My grandson attends 7 Hills School, and children need to grow up surrounded by a beautiful pristine undeveloped area like Seven Hills Ranch contiguous to the school. There aren't very many areas left like this in the Walnut Creek area.

2,819. Suzanne T	Walnut Creek, CA	Our family uses this park very frequently and enjoy the Seven Hills Ranch hills and its natural beauty and habitats. Do not disturb this valuable piece of nature near our homes. Our schools take field priceless field trips here. There has been so much development downtown; there should be an equal amount of land preserved as a requirement for any development. I am asking that no development be allowed on this Sever Hills space.

2,830. Christine C	Walnut Creek, CA	Stop high density housing developments in our city. Our traffic is extremely congested, water shortage concerns, etc. We have an over extended police and emergency services, as it is. These types of projects need a much larger size property to adequately accommodate their needs. This should not be an infill project. Nearby homes/property should guide and dictate its use. This is a large commercial property that needs to be placed in an area zoned specifically for these types of projects. Do not make an exception for this property.

2,834. Danielle A	Walnut Creek, CA	I grew up in this neighborhood and community and one of the most special things about it is its natural beauty, rolling hills and family neighborhood feel. A massive compound would not be a good fit in that location. Heather Farm and it's surrounding area is part of what makes Walnut Creek Walnut Creek. It preserves the essence of the city itself and its origins. A plan for single family homes would fit much better and allow for the continued enjoyment of the beauty of the park and surrounding community.

2,839. Nickolas K	Walnut Creek, CA	Global Warming!!!! Overcrowding Walnut Creek traffic and destroying natural open space is WRONG! Enough is enough!
2,840. Fiona S	Lafayette, CA	You can not get the land back and this is an oversized development with little appreciation for the land it is carving up.
2,841. joe P	Walnut Creek, CA	An eight unit development is proposed at 1394 Walden Road. Although not at the same scale as this proposed development it will greatly impact my family and my community and disrupt the character of the neighborhood. I see the same for this Seven Hills Ranch. Wild animals are running out of places to live and we don't need the added automobile and housing congestion. Please rethink this proposal, I believe most residents in the area are against this development.

Once you start allowing all this development, it turns disquiet little sleepy town and does something else completely. Downtown is an example. Now we have a crime here that we never used to have. Turning seven hills into more pavement is just like turning this place into Los Angeles north where I grew up. Walnut Creek is turning into exactly where I do not want to live. It is not advice to wanna live in a little crime area was rolling Green Hills, I'm good property values. Why else would other people want to build here and why else would people want to live here?

We cannot afford to have more traffic in one of the most congested areas within Walnut Creek and our city. This idea of building more homes to increase tax revenues never works as it ultimately costs the city and county much more money than it brings in as there is a need for more police, more teachers, more county personnel and city personnel, at least there should be... There has been no new roads built or roads widened or anything else done to move people through our area yet, we just keep building and hoping things will just work out.

I feel it is of the utmost importance for ourselves, our children and grandchildren to preserve natural resources and to keep from increasing traffic density. In addition, this is going to be a very expensive development, only affordable to the wealthy. I am not a person to wage class warfare, i.e. designating persons of wealth as enemies. I also feel that California\'s and perhaps especially the Bay Area\'s economy is not healthy despite the fact that there is a lot of money floating around. The wealthy will always find nice places to go and live; leave a bit more open space to breathe for all of us, and especially those who have little access to fresh air, open spaces, and recreational and restorative places, except public parks, etc.

There isn't enough infrastructure support for public and alternative transit. 3,515. Mary Jo P	Walnut Creek, CA	This development will lead to more congestion and traffic on an already congested Ygnacio Valley Blvd. Nearby residential areas will be harmed. Loss of open space. Unnatural valley fill-in, plus leveling of hills will lead to habitat harm. This huge, dense development will affect every Walnut Creek resident. We do not need this development, but if it goes forward, it should not be approved without major down-sizing.
3,516. Donald N	Walnut Creek, CA	Too much traffic during and after construction. Air pollution and nuisance noise during construction.
3,517. Leslie L	Walnut Creek, CA	The Spieker development project will directly impact the traffic to our street and closest to our home. They would create more traffic around the elderly and families in our neighborhood who walk to/from Heather Farms Park. Construction will be detrimental to the wildlife cohabitating peacefully with us in our area (large herd of deer, turkeys, raccons, skunks, coyotes, etc). The proposed \"senior\" community prices-out even current Walnut Creek residences (see Stoneridge Creek in Pleasanton). How is this desirable?? Walnut Creek is a desirable community because of all the beautiful open spaces not because of urban sprawl. We have lived in this neighborhood since 2004 and we SAY NO TO SPIEKER

3,520. Rickie F	Walnut Creek, CA	We need open space for the air we breath, and stress release. Animals are dependent on this space, as well. Ygnacio is a heavy trafficked area already. Access to Marchbanks will be difficult with a short left turn lane from Ygnacio, and no area to lengthen the turn lane. Heather Farms area has enough traffic from multiple units, already. It is not the appropriate use of land for this area. It is very landlocked and the access is poor and will impact the community in a negative manner. The Heather farms park and surrounding area is a beautiful locale proving a nice relief from urban living. This plan will ruin the area with traffic and congestion not to mention the destruction of the rolling hills and valleys and animal habitats. Vote no on this ridiculous idea.

I've been here 75 years, rode my bike over graded land now called 680, then sadly watched from a distance the lights of high rise buildings going up in WC. This was once a paradise for those growing up and living here. It was safe, quiet, peaceful country towns for all, including wildlife. We're now forced daily to fight thousands of cars and crazy drivers on over crowded roadways, we sadly witnessed the disappearance of beautiful orchards, quaint farms, and gorgeous ranch lands now smothered by millions of homes, apartments, shopping centers, businesses, etc. The cattle, sheep, and thoroughbred horses now gone. Violence is growing in every city and neighborhood while wildlife habitats are continually encroached upon leaving them wandering the neighborhoods in sersch of food, water, shelter; unfortunately, too many end up on roads and freeways. The idyllic terrain and lifestyle we once experienced and enjoyed in the bay area have been drowned out by developments, poor planning, greed, and bad politicians. Barely affordable for many. It is no longer paradise, recognizable, safe, peaceful or home. If i wasn't 75, I'd be gone. Please stop the insanity!</p>

3,803. Julian R	Concord, CA	The continued conservation of natural environments is crucial. There are existing infrastructure that lays abandoned in many parts of the Bay Area and the rest of the State, as well as already developed plots with no infrastructure. Instead of destroying Seven Hills, use what's already available.
3,804. Anastasia H	Walnut Creek, CA	Seven Hills is a rare oasis for native critters and plants AND people who live around it, Even if they never set foot on the land, the land acts as a visual and mental oasis, a rest from the wild over-development in the whole East Bay, and most especially along the Ygnacio corridor. We must hang on to what open spaces we have. This one is not unused, but heavily populated with beings that are not human. It's a nice thought. Let's keep it that way.

3,809. David G	Walnut Creek, CA	I don't mind it being developed - but creating luxury housing for seniors doesn't help create more affordable housing in the area - which should be the goal of any project developing previously undeveloped lands. I also worry that in the case of economic failure this would leave both irreversible site damage and non-ideal buildings to repurpose (i am skeptical that in these covid days you could really get old people with money to live in a 300-unit building). This isn't just building condos - it's building a particular business that may or may not work - and if it doesn't work we've turned a very pretty lot into a very large scar.

3,815. Jenny P	ORINDA, CA	This area is already densely populated, causing a real nightmare on Ygnacio EVERY day.(not to mention the hazard for evacuation possibilities) It would add to the congestion and become an overwhelming burden on the infrastructure. Open space is a Walnut Creek legacy that should not be compromised. Species that live there cannot go \"somewhere else\" because there is no somewhere else anymore. This 30 acres is a viable and essential wildlife corridor and habitat. The proper course of action would be to annex to Heather Farms or WC open space. It is not acceptable to change the general plan simply to accommodate this intrusive development.
3,816. Charmain H	Pleasant Hill, CA	A big part of why this area is nice to live in is because of how much natural beauty is sprinkled throughout the community. Housing is needed but there are more urban parts of Walnut Creek where housing can be developed. We need places where we leave the land intact. This is environmentally important. Construction as an industry is a huge polluter. Development of our wild areas brings pollution of many kinds into the area. I believe it is in the best interest of the area and of Walnut Creek in particular to not develop this natural area. There are unused areas of town that can be re-purposed instead of destroying all of this nature to put up multi-story buildings. It's a bad idea.
3,817. Patricia M	Walnut Creek, CA	This going to impact our lives and create additional traffic to a already heavy traffic area. We need more affordable living not expensive living

3,825. Lee F	Lafayette, CA	Urban spread into wildlife areas has become too much, especially when there is so much vacant housing nearby.
3,826. Ali B	Walnut Creek, CA	The proposed plan has adverse impact on environment and traffic. This plan only benefits developers and investors who proposed the plan.
3,827. David L	Pahrump, NV	When I visit family in this area, I like to visit the park.
3,828. Jennifer R	Walnut Creek, CA	Preserving Plant habitat is more important than ever given the rapid decline of native insects and birds.

3,833. Georgette H	Martinez, CA	Destroying valuable habitat in this day and age is not acceptable. We cannot continue to justify destroying our environment and displacing wildlife. We're destroying our planet.
3,834. Brigitte L	Walnut Creek, CA	A development of this size and density would ruin one of the most beautiful parks in our town. Not to mention destroy habitats for thousands of animals already pressured beyond belief due to drought and climate change. Please deny this action.
3,835. Maureen L	Alamo, CA	These open spaces that are important to the environment and to wildlife must be saved.

3,840. Holly G	Lafayette, CA	We are part of the seven hills community. I'm concerned about the impact on traffic. The environmental toxins that the community surrounding will be subjected to. The sad consumption of such beautiful land to which extent seems unnecessary. The safety of our community. The access to sunlight and natural space which is critical to emotional and mental well being.
3,841. Dane M	Pittsburg, CA	We go to this area often to walk our dog. This is one of the only in city open spaces in the Bay Area. Heather Farm is the golden gate park of Diablo valley. It would be a shame to make it smaller.
3,842. Dana M	Pittsburg, CA	This would greatly affect The Seven Hills school. The space is not large enough for a k-8 middle school AND a care facility.
3,843. Peter S	SAN FRANCISCO, CA	Because we need open space in Walnut Creek to maintain the quality of life.

3,846. Ahren B	Walnut creek, CA	The ranch is my backyard and it is a massive reason why my family lives here. We appreciate the view and wildlife every day and would certainly have to move away if it were developed and paved. It should be open as a natural open space for people and animals to appreciate.

3,860. Torrey F	Walnut Creek, CA	This is important to me because I am a resident of Walnut Creek. My husband and I have raised our three beautiful children here. I strongly believe we must preserve this beautiful open space. We have an obligation to the wildlife and to our children to preserve and value nature. The Seven Hills School which has been a wonderful place for our children to attend would be impacted by this construction. I strongly oppose the destruction and disruption that this proposed community would bring. Please help us save the beautiful open space one of the last in Walnut Creek. Thank you
3,861. Susan R	Walnut Creek, CA	With so much development in Walnut Creek and the rest of the East Bay, it's critically important to preserve Seven Hills Ranch's 30 acres of open space as necessary habitat for plants and wildlife and as a place where people can connect with wild nature.

3,866. Kathy K	Orinda, CA	The proposed development is obscenely oversized and the destruction of the land and addition of so many residents and employees will affect everyone that travels on that area of Ygnacio Valley Rd which could be life or death for those on their way to John Muir Hospital in an emergency. Wonder how you that would affect the neighbors in an evacuation for fire which is a legitimate concern in these times.
